

# ABDUL ADHIL K

## AI/ML ENGINEER

+91 8075227540 | abduladhil11@gmail.com | [LinkedIn](#) | PALAKKAD, KERALA, INDIA

---

### ABOUT

AI/ML Intern with hands-on experience in Python, machine learning, and data-driven projects. Skilled in data preprocessing, model development, and applying ML techniques to real-world problems. Eager to contribute to AI/ML projects while developing practical expertise and building intelligent solutions.

### INTERNSHIP

#### AI/ML INTERN

Linnk Academy India

Jun 2026 - Present

- Developed machine learning models using Python and Scikit-learn for regression, classification, and clustering tasks.
- Performed data preprocessing, exploratory data analysis, feature scaling, and feature selection using Pandas and NumPy.
- Trained and evaluated models including Linear Regression, Logistic Regression, KNN, Decision Tree, Random Forest, and K-Means.
- Applied PCA and data visualization techniques to analyze datasets and interpret machine learning results.
- Evaluated model performance using appropriate classification and regression metrics and addressed issues such as overfitting and data leakage.

### TECHNICAL SKILLS

- Programming: Python, Java, C
- Machine Learning: Scikit-learn, Regression, Classification, Clustering, KNN, Decision Trees, Random Forest, K-Means, PCA
- Data Science: NumPy, Pandas, Matplotlib, Seaborn, Data Preprocessing, Exploratory Data Analysis
- Web Development: Flask, Django, React.js
- Databases: SQL, SQLite
- Tools & Technologies: Git, GitHub, VS Code, Jupyter Notebook
- AI & Embedded Systems: Embedded AI, ESP32, Raspberry Pi, Arduino IDE

### EDUCATION

B.Tech – Computer Science and Engineering | 2022 – 2026

TKM Institute of Technology, Kollam

### PROJECTS

#### Guardian Sole – Smart Footwear

- Developed a smart footwear system designed to improve safety and mobility for elderly and visually impaired users.
- Integrated ESP32, MPU6050, FSR sensors, and ultrasonic sensors for real-time movement, pressure, and obstacle monitoring.
- Implemented fall detection, gait analysis, obstacle detection, and emergency alert mechanisms for real-time safety monitoring.
- Developed embedded software for sensor integration, data processing, and real-time response using Arduino IDE.
- Designed a compact and low-cost wearable prototype focused on practical safety and accessibility.

### CERTIFICATIONS

Python for Data Science — NPTEL, 2025
